Subject: ST6923 Displacement Vibration Transmitter

The ST6923 Series Vibration Transmitter has been phased out of the Metrix product line. Depending on application, we can offer the ST6917 as an alternative. It reads in Velocity units, and also has a male 2-pin MS connector type, and ¼-28 UNF mounting stud. (Please consult the factory or visit our website).

We are phasing out the ST6923 because a part for this product is no longer available from our vendor. We have limited stock which is reserved for warranty replacements on field defective units. Upon the request of our customers, we will support the ST6923 applications by offering suitable replacement ST6917 (when applicable) for the specific model.

We apologize for any inconvenience. Should you require additional information or wish to discuss an application, please feel free to call Metrix Instrument Co.

Respectfully,

Carlus Sandlin 713-461-2131 Ext. 221
